Courtsol advantages

COURTSOL PRODUCTS : A COMPLETE RANGE OF SUPERIOR ACRYLIC COATINGS

FONGIMUR

Curative and preventive decontaminating solution for a remedial treatment of surfaces biologically polluted by mosses or moulds.

COURTSOL PRIMER ES 40

ES 40 is a creamy copolymer primer used on properly prepared asphalt surfaces as a primer and bond coat prior to application of Courtsol acrylic textured compounds. ES 40 is also used to improve eroded or weathered porous surfaces.

COURTSOL PRIMER ES 15

Clear copolymer primer used as a bond and tack coat to renovate old synthetic coatings.

COURTSOL CUSHION BASE WITH COURTSOL S1

Special coating made of flexible resins and coarse rubber aggregates formulated to create a comfortable cushion. Used in "Courtsol Pro" surfaces.

COURTSOL CUSHION BASE WITH COURTSOL S2

Acrylic resin with predispersed fine rubber aggregates for use over Cushion S1. It imparts a tighter surface finish resulting in player comfort and good ball response.

COURTSOL RESIBASE BP

Acrylic coating reinforced with coarse sand to patch and level new or old surfaces. Mixed with cement, this superior patching compound enables correction of deep depressions up to one centimeter, as well as minor irregularities of the surface.

COURTSOL RESIBASE

Acrylic emulsion with predispersed medium sized aggregates used for intermediate coats of Courtsol multicoat systems.

COURTSOL RESITOP

Acrylic emulsion with predispersed fine size mineral aggregates. Results in a fine texture surface for sure footing, sliding and reliable ball bounce.

COURTSOL COLOR

Quality pigmented synthetic resin, with a wide range of colours. Imparts a very appreciated tough wearing colored finish. Anti reflective. To be applied in two coats over concrete or asphalt after application of primer.

COURTSOL LINES

Acrylic paint delivered ready to use to be applied in a single coat. Available in white and other playground marking colours.

Basket-ball, Badminton, Volleyball, Padel, Handball, Multisport, Tennis
Acrylic Sport Surfaces
Anti-skid grounds

COURTSOL STANDING

Three-coat system for new or existing asphalt and concrete courts, playgrounds or similar surfaces. This system is effective in restoring weathered and eroded areas to a smooth, refurbished playing surface. Courtsol Standing is recommended for intensively used sport areas

COURTSOL STANDING PLUS

Four-coat system for new or existing asphalt and concrete courts, playgrounds or similar surfaces. This system is effective in restoring weathered and eroded areas to a smooth, refurbished playing surface. Courtsol Standing Plus has a special paint finition, which provides extra speed to the surface.

COURTSOL TOURNAMENT

Five-coat system for surfacing new or existing tennis courts, playgrounds or similar surfaces. The flexibility and the fine texture of the surface offer a satisfying play and a high resistant coating.

COURTSOL PRO

Eight-coat system for surfacing new or existing asphalt and concrete tennis courts, playgrounds or similar surfaces. Courtsol Pro differs from conventional coatings, not only in the quality of the resins used, but also in the unique blend of specially sized rubber aggregates, which imparts an outstanding cushion effect. Courtsol Pro increases play time by reducing player's fatigue while providing an extremely reliable, efficient and consistent ball spin. Courtsol Pro is considered by professional players as a top quality surface.

COURTSOL PRO PLUS

Nine-coat system for surfacing new or existing asphalt and concrete tennis courts, playgrounds or similar surfaces. Courtsol Pro Plus compared to the regular Courtsol Pro has an extra paint finition, which provides speed to the surface, and therefore can be classified category 5 according to ITF.

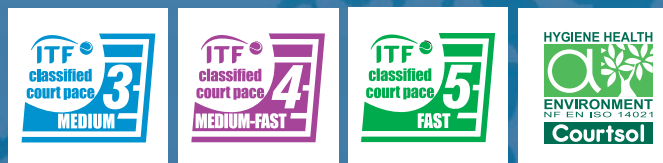

COURTSOL COMFORT

Four-coat system for old or new courts. The specificity of the Courtsol Comfort system lies in the application of our resins on a supple carpet stuck on the surface. This system offers to the players maximum comfort, little risk of accidents. It is particularly adapted to playgrounds.
